You can also find us on Facebook and Instagram!

We offer 3 sizes of vegetable shares, a mini, a small and a large, they run for 15 weeks beginning mid to late June and running until late September, picked up weekly from our farm.

**Mini share – NEW FOR 2018!** This is a great share for a single person or a family who does not go through a lot of vegetables or who want to supplement what they are already growing themselves. The cost of this share is \$180.00 and works out to around \$12 worth of produce each week.

**Part Share** - This is a great size for a family of 2 - 3 or 1 veggie loving adult. The cost of the part share is \$375.00 and works out to around \$25 worth of produce each week.

**Full Share** - This is a great size for a family of 4 – 5 or 2 veggie loving adults. The cost of the full share is \$525.00 and works out to around \$35 worth of produce each week.

The shares are picked up on **Wednesdays between 4 – 6:30 pm**. If there is a week you are unable to pick up, please let us know in advance or arrange someone else to pick up your share.

The shares include a variety of different vegetables and herbs, all of which are grown organically on our farm. We also produce and have available for sale: maple syrup, pasture raised meat, free range eggs and cut flowers. If you are interested in all of the products we have ask us about our deluxe shares!

### Vacation Option:

For those that plan on being away for summer holidays we have the option of being able to choose 2 weeks you will not be to the farm to pick up your share. The cost of your share will be adjusted to reflect 13 weeks instead of 15 weeks. Please advise us at the time of registration if you would like this option and give us advance notice of which weeks you will be away.

NOTE: As with any farming we are subject to the weather and pest problems, which can result in crop failures of certain vegetables or a late start to the season. There may be weeks where certain vegetables are not available. What is included in your weekly share is what is ripe and ready at that point in the season. By buying local organically grown produce you are receiving vegetables and herbs that are at their freshest and nutritionally their healthiest.
